linkedin.com/in/navyashree09 | github.com/Navyashree0921 | Mysuru, Karnataka

PROFILE

Software Engineering student with a CGPA of 9.39 and strong foundations in Data Structures & Algorithms, DBMS, OOP, and Computer Networks. Experienced in building full-stack applications using React, Node.js, REST APIs, MongoDB, and MySQL, with exposure to AI/NLP-based solutions. Passionate about developing scalable software and solving real-world problems through technology.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

JSS Science and Technology University (SJCE) | Mysuru, India

CGPA: 9.39 | 2023 - 2027

Masters PU College, Hassan

12th – Percentage : 97.33% | 2021-2022

Royale Apollo International School, Hassan

10th – Percentage : 98.28% | 2020

TECHNICAL SKILLS

- **Languages:** Java, Python, C, SQL
- **Data Structures & Algorithms**
- **Core:** OOP, Operating Systems, Computer Networks, DBMS
- **Frontend:** HTML, CSS, JavaScript, React.js
- **Backend:** Node.js, Express.js, REST APIs, Flask
- **Databases:** MongoDB, MySQL
- **Tools:** Git, GitHub, Linux, VS Code, MySQL Workbench

PROJECTS

Smart Complaint Analyzer | Tech: Python, Flask, HTML, CSS, JavaScript, NLP, Scikit-learn

- Architected an **AI-powered complaint management system** enabling complaint registration, tracking, automatic categorization, priority prediction, and department assignment.
- Utilized **Natural Language Processing (NLP) and Scikit-learn models** for complaint classification and sentiment analysis, improving the accuracy of complaint routing.
- Optimized administrative workflows through **REST APIs**, secure **user authentication**, PDF report generation, and a **responsive dashboard** for efficient complaint management.

Smart Inventory Management System | Tech: React.js, CSS, Node.js, Express.js, MySQL

- Created a full-stack inventory system with **REST APIs** to manage products, batches, and donation workflows
- Implemented **role-based access control** for Shopkeepers and NGOs to streamline donation and inventory operations
- Designed a **normalized database schema** with relational tables to ensure data consistency
- Built features like **expiry alerts using SQL views** and donation tracking using JOIN operations

Wanderlust - Travel Listing Web Application | Tech: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB

- Engineered a full-stack platform supporting REST APIs and CRUD operations
- Integrated secure authentication via **Passport.js** along with **Cloudinary** for media handling
- Enabled geolocation-based visualization using **Leaflet.js**
- Leveraged **MongoDB Atlas** and **Render** for cloud storage and deployment

CERTIFICATIONS

- **Sigma 6.0 - Full Stack Web Development** (Apna College)
- **Fundamentals of Machine Learning and Artificial Intelligence** (AWS Training & Certification)

INVOLVEMENT

Editor - The Editorial Club, SJCE | 2025

- Reviewed and organized content for the college publication “Jayzine”, collaborating with the editorial team to maintain quality and clarity.
